

GROUNDCOVER FABRICS

Protex

Protex is a black, multi-purpose, woven polypropylene ground cover, combining outstanding weed suppression with excellent water permeability. Instantly recognisable by its distinct and unique Red and Blue stripe pattern.

Protex is designed to provide weed-free growing areas for:

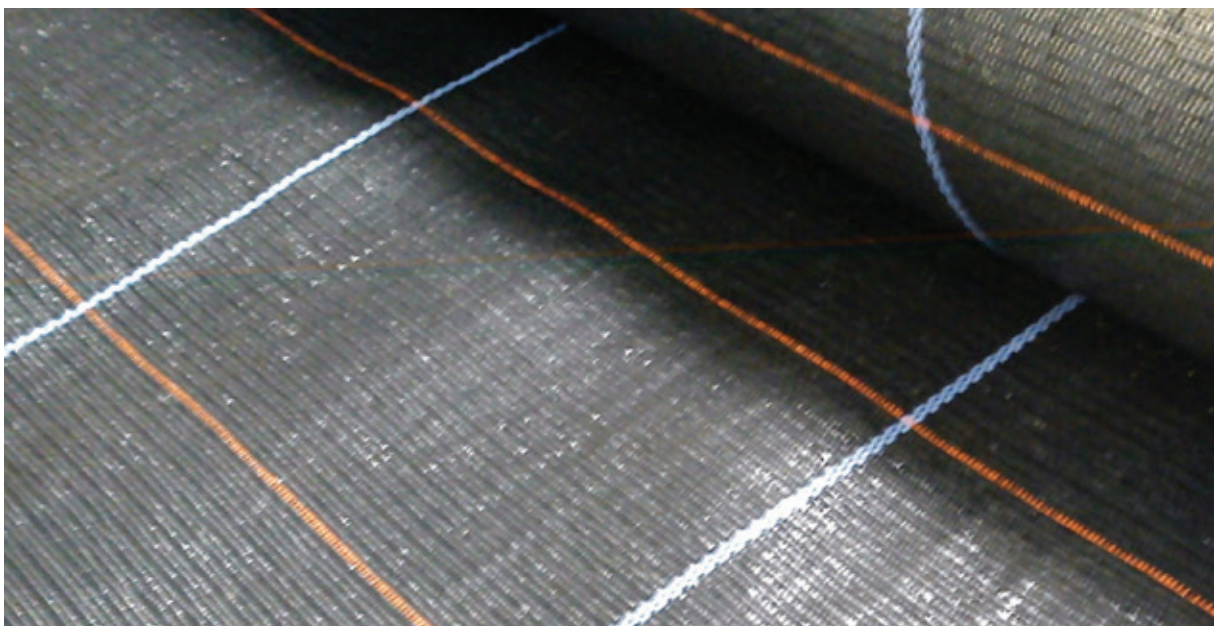

- Landscaping
- Planting
- The production of bedding, pot plants and container stock
- Use in Organic Growing Systems
- Outdoor, polytunnels, glasshouses and on benches
- Capillary, sand and gravel beds.

Features:

- Unbeatable weed suppression without spraying
- Water permeability of 10L/m²/second means no puddling and maintains subsoil moisture levels
- Protex Ground Cover is UV resistant with 5 year guarantee
- Tested in desert conditions - unaffected by extremes of temperature
- Puncture and tear resistant. Can handle pedestrian and light vehicle traffic
- Maintains soil temperature to encourage strong root growth
- Improves presentation and positioning of pots and plants
- Shown to increase crop yields by up to 14%
- Reusable over many seasons
- Easy to maintain and clean
- Protex is a registered trademark.

Note:

Before applying Protex to soil surfaces, ensure that all existing weeds are treated with an appropriate weed killer. Protex should not be applied over sharp or coarse uneven surfaces. We are happy to advise on suitable weed control. Tel: 01 8437808 (press option 1 for Sales Team).
