

SWD (Spotted Wing Drosophila) – Fruit Fly trap

- Bait trap suitable for mass capture and monitoring of fruit flies
- Sustainable and refillable
- For wide area application
- Simply plug it together, fill it, hang it up
- Affordable, 100% recyclable

The SWD – Fruit Fly trap consists of 3 parts:

1. Stackable, transparent beaker, diameter approx. 7.5 cm, height approx. 6 cm
2. Re-closable red lid, diameter approx. 7.5 cm, height approx. 2 cm
3. Red hanger, length ca. 10 cm, width approx. 2.8 cm

All parts are made of weather-resistant polypropylene. The user can assemble the trap very easily and place it directly in the right place.

The holes on the lid edge are designed in such a way that no larger insects are caught.

The bright red cover colour attracts the fruit fly. Through the transparent cup it is easy to monitor the trap without opening it.

The SWD trap can be used several times and is recyclable.

The trap is filled with approximately 75 ml of bait liquid.

It can simply be emptied, cleaned and refilled.

The bait liquid is also available from NAD.
