

WETTING AGENTS

DewSmart

10L

code **DEWS01**

10L/ha

A newly formulated, highly effective dew dispersant product for turf grass areas. Can be used as part of an Integrated Disease Management programme to help reduce the risk of disease attack.

H2PRO Conserve

5L

code **H2PR**

10-25L/ha

H2Pro Conserve is a preventative and curative wetting agent that can be applied monthly, bi-monthly and annually in a programme to best fit your maintenance needs.

H2PRO Granular

10kg

code **H2PR01**

20g/m²

A wetting agent in granular form.

H2PRO Tabs

6x1 Tab/Box

code **H2PR02**

1 tablet will treat 250-500m² using the applicator gun below.

H2PRO Tablet Applicator Gun

code **H2PR03**

Use when applying H2PRO Tablets above.

H2PRO Maximise

10L
200L

code **H2PR05**
code **H2PR04**

40L/ha

A penetrant wetting agent formulated to remove surface waters.

WETTING AGENTS

H2GRO

10kg

code **H2GR**

0.5-1.0kg/m³ of growing media

New surfactant that remains in the growing media to allow water to re-wet the compost .

H2FLO

5L

code **H2FLO**

0.6-1.2L/ha

Wetting and water conservation agent.

A blend of soil surfactants to reduce the surface tension of irrigation water allowing both vertical and lateral movement of water. Allows growers to maximise the efficacy of irrigation, reduce water rates and improve yields.

Qualibra

10L

code **QUAL01**

20L/ha

Wetting and water conservation agent.

Qualibra combines a unique and dynamic penetrant with a powerful polymer to optimise water penetration and conservation with the rootzone.
